

# Secure top performance at a cost you can predict

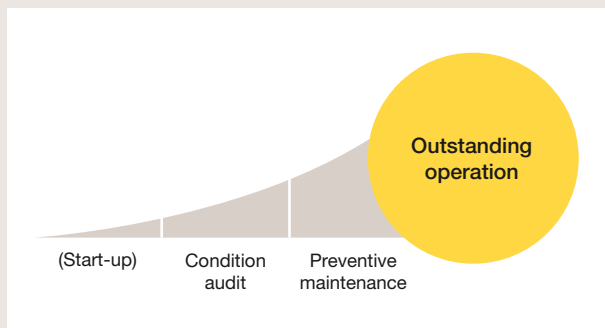

Performance Agreements gives you uptime and security

Ensuring reliable and highly-efficient operation over the lifecycle of your decanter is the most important driver for minimizing total cost of ownership. An Alfa Laval condition audit can identify problems before they impair performance or cause an unplanned shutdown.

## More than the sum of the parts

Combining services achieves a greater total result. You enjoy top performance and maximum uptime, while knowing your service costs in advance. That brings you true security, as well as a short pay-back time.

## Here's how a typical Performance Agreement works

## Condition Audit

An Alfa Laval Service specialist performs a Condition Audit within 12 months of the commissioning of your equipment. This includes:

- On-site inspection visit
- Feedback on the condition of the equipment and requirements
- Suggestions for improvements

## Preventive Maintenance

An Alfa Laval Service specialist conducts Preventive Maintenance according to the service intervals stated in the operating manual. The cost for the spare parts needed to carry out these services is included in our fixed price.

## Service that pays off

Regular service and maintenance is your best guarantee for achieving the lowest cost of ownership. Proper equipment operation and maintenance minimizes downtime and optimizes performance.

With first-class service from Alfa Laval, unplanned shutdowns are a thing of the past. More uptime

means less hassle, longer equipment service life, and lower cost of ownership for greater profitability.

In choosing Alfa Laval, you are getting the perfect long-term partner for your daily operations. Our service network reaches you anywhere you are.
